### ***Numbering of Claims***

The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claim 27 (second occurrence) has been renumbered as claim 28.

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, 21-23, 28 and 29 drawn to a method of food preparation, classified in class 426, subclass 523.
- II. Claims 15-20, 24-27, 30 and 31, drawn to a food preparation apparatus, classified in class 99, subclass 420.

The inventions are distinct, each from the other because:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus of Group II as claimed can be used to practice another and materially different process, e.g. for use in holding clothes or tobacco

leaves for drying. Moreover, the method of Group I as claimed can be practiced without the specifics of the Group II apparatus such as a top surface, a bottom surface, a guide rail positioned parallel to and between the top and bottom surfaces having a front end and a back end, food carrying means having a base that is mounted on the guide rail, a grease pan, a coiled drive means supported by the guide rail, carrier means located between adjacent coils of the drive means, and a plurality of magnets are spaced on the guide rail in predetermined non-linear locations.

If applicant elects the apparatus of Group II (claims 15-20, 24-27, 30 and 31), the following species restriction is further applied:

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species A depicted in Figure 1 and recited in claims 15-17 and 24.

Species B depicted in Figure 5 and recited in claims 18-20.

Species C depicted in Figure 3 and recited in claims 25-27, 30 and 31.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

Art Unit: 1761

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the response to this requirement to be complete must include an election of the invention (and species if applicable) to be examined even though the requirement be traversed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to George C. Yeung whose telephone number is (571) 272-1412. The examiner can normally be reached on Monday-Friday from 10:30 AM to 7:00 PM.
